## REMARKS

Claims 1-7, 9-11, 15-45, 51-52, 55-59, 68, 73, 76, 82-83, 85, and 89-93 have been amended. No new matter has been added by virtue of the amendments; support therefor being found throughout the specification and in the original claims of the application. Additionally, the within amendment is presented in large part, to reflect sequence identifiers where appropriate and to otherwise conform to the sequence rules. The remaining amendments are presented to remove improper multiple dependencies, correct minor informalities and generally to conform the claim set to U.S. patent practice.

Early examination and allowance of the application are earnestly solicited.

Respectfully submitted,
